DERC DPLT-Nozzle

FOR INTERNAL BUNDLE CLEANING MACHINES UP TO 1500 BAR

The DERC Power Lance type (DPLT-nozzle) is designed for cleaning with internal bundle cleaning machines up to a maximum pressure of 1500 bar/ 22K. The nozzle is protected against mechanical damage because the nozzle holes are drilled in a groove of the nozzle-body.

INNOVATIVE DESIGN

The innovative design gives the DPLT-nozzle an optimal flow, better results and a longer life cycle. The DPLT-nozzle is available in two versions: Ø 10 mm with male thread of 5/16" UNF and Ø 8 mm with male thread of 1/4" UNF. The nozzle-body is corrosion resistant, hardened and guarantees a long life cycle. The nozzle will be configured and drilled for the job or according to customer specifications.

STOCK ITEM

The DPLT-nozzle is a stock item with a short delivery time and an attractive price level.

CONFIGURED ON REQUEST

The nozzle will be optimally configured for your working conditions. Based on your requirements and specifications (such as pressure, pump capacity, use as pulling/ pushing or neutral, connection, thread, permissible reaction force and spray pattern) we can advise you on the optimal configuration.

DERC DPLT-NOZZLE

CONNECTION	THREAD	LENGTH	DIAMETER	PART NO.
1/4" - 28 UNF	Male	30 mm	Ø 8 mm	DPLT-14UM.xxx
5/16" - 24 UNF	Male	37 mm	Ø 10 mm	DPLT.xxx
