DERC DPT-Nozzle

FOR CLEANING HARD PLUGGED TUBES UP TO 1500 BAR

The DERC Pyramid Type (DPT-nozzle) is designed for cleaning hard plugged tubes with a maximum pressure of 1500 bar/ 22K. The nozzle is protected against mechanical damage because the nozzle-holes are drilled in a groove of the nozzle-body.

INNOVATIVE DESIGN

The innovative design gives the DPT-nozzle an optimal flow, better results and a longer life cycle. The DPT-nozzle is available in three diameters. The nozzle-body is corrosion resistant, hardened and guarantees a long life cycle. The nozzle will be configured and drilled for the job or according customer specifications.

STOCK ITEM

The DPT-nozzle is a stock item with a short delivery time and an attractive price level.

CONFIGURED ON REQUEST

The nozzle will be optimally configured for your working conditions. Based on your requirements and specifications (such as pressure, pump capacity, use as pulling/ pushing or neutral, connection, thread, permissible reaction force and spray pattern) we can advise you on the optimal configuration.
