# DERC DTLX-Nozzle

## FOR CLEANING WITH (FLEX) LANCES UP TO 1500 BAR

The DERC DTLX-nozzle is specially designed for cleaning with (flex) lances, up to a maximum pressure of 1500 bar/ 22K. The nozzle is protected against mechanical damage because the nozzle-holes are drilled in a groove of the nozzle-body.

### INNOVATIVE DESIGN

The innovative design gives the DTLX-nozzle an optimal flow, better results and a longer life cycle. The DTLX-nozzle is available in three different diameters. The nozzle-body is corrosion resistant, hardened and guarantees a long life cycle. The nozzle will be configured and drilled for the job or according customer specifications.

### CONFIGURED ON REQUEST

The nozzle will be optimally configured for your working conditions. Based on your requirements and specifications (such as pressure, pump capacity, use as pulling/ pushing or neutral, connection, thread, permissible reaction force and spray pattern) we can advise you on the optimal configuration.
